

Software Developer

Salary: £30,000-£35,000 pa

Hours of work: 40 hours per week, 8-5pm, Monday to Friday

Location: Knaresborough, UK

This developer will be working on in-house solutions for cloud interfacing, data management, and procedural systems within a small subset of the company's software development team.

These systems are coded primarily in C# with JavaScript to assist with a smooth user experience. This developer will be expected to be able to make basic user interfaces to support the system and aid the end user, in most cases we utilise the Bootstrap framework to help improve the user experience.

We primarily use a mixture of MSSQL and PostgreSQL accompanied by PostGIS for the backbone of the system which is serving the data in a usable context for the end user. The developer will be expected to have at least a basic level of knowledge using SQL Syntax and practical experience of writing bespoke stored procedures to help manipulate large amounts of server-side data.

The ideal candidate will have worked in web development previously having exposure to web forms, MVC, and Entity Framework. The developer will be expected to manage their own tasks through system such as JIRA, and ensure that they are regularly submitting their code to our version control system (GIT).

Essential:

- Development experience in C Sharp, ASP.NET and SQL
- Degree in Computer science or equivalent qualification
- Experience working with Version control systems
- Experience with working within a team

Desirable:

- Experience with Cloud Technology
- Geospatial knowledge is desired but not required
- Experience working with Jira
- Experience working in an Agile/DevOps environment
